

Questions / Answers concerning the Pucker Street Dam RFP:

1. Can the impoundment be increased via closing of the gates?
  - a. The gates can be operated but the impoundment level cannot increase due to the run of the river conditions for the dam.
2. Will the City purchase the power?
  - a. Currently, the City is in a full service power agreement with AEP. The agreement limits the amount of alternate power which can be generated for the City's use. The Board has not made any decision on whether or not the power from the dam would be purchased.
